

## ***Mega Air Cleaners***

***Always Fresh – DIU (Duct Insertion Units)***

### **BENEFITS OF the DIU System:**

- ✓ **Application specific**
- ✓ **Microbe / odor / gas targeting and measurement**
- ✓ **Disinfection / Ozone / Filtration**
- ✓ **In-line retrofit to existing systems**
- ✓ **Performance measurement and remote monitoring**

Providing technology solutions for contamination control, Radiant Industrial Solutions is your leader in sanitary solutions through disinfection technologies. Known for Ultraviolet, Radiant continues to provide application specific solutions to Air circulation, Fresh air entry, Product direct, Water source, and Surface exposure applications.

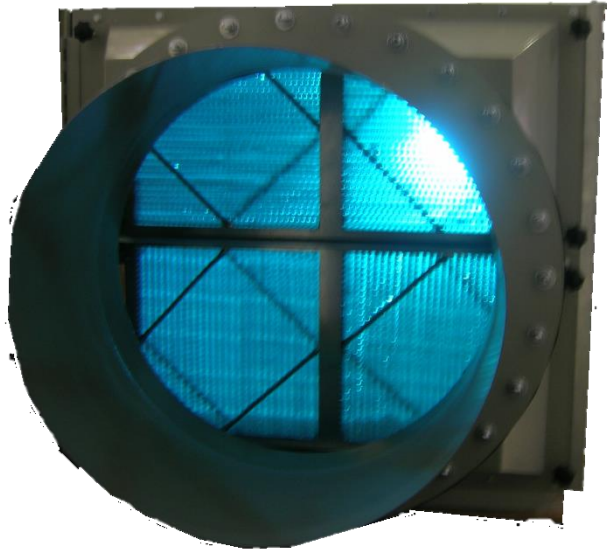

Sizing application to science, providing results that are measurable

Radiant is your partner for disinfection contamination control

2121 Brittmoore Rd., Ste 3900  
Houston, TX 77043

**Source Direct Control**

**Food processing microbial control**

**Waste Plant Odor Control**

**Disinfection:** Targeting microbes at the surface, destroying the DNA of contamination at the source.

**Product Construction**

Made in the USA - all of it.  
Materials – Stainless to steel, depending on application need

**System Shown**

**Designed airflow 90,000 CFM In-Duct Disinfection / Odor control**

Inlet / Outlet: 3ft Diameter  
Dimensions: 82in long by 52in wide by 41in tall  
Power: 24VAC / 30Amp / 60Hz / 1  $\phi$

**Air Movement** Designed to application  
**UV Disinfection** Application specific  
**Ozone Output** Available upon request  
**Filtration** Application specific

Further information available upon request
